

Ezekiel Cash, Age 87

Home: 300sq. ft.

Mr. Cash has lived in the same home for 87 years and has never had running water or toilet facilities in his home. That is, until a group of volunteers from Bahamas Methodist Habitat donated a week of their life to install running water, a shower, sink, toilet and a new septic system.

Today, Mr. Cash looks at life differently. His life has been changed. The volunteers' lives have been changed even more.

There are thousands of situations like this in the out-islands of the Bahamas.

Donate a week.

Change a life.

Yours.

Eugene and E.J.

Home: 200 sq. ft. built from scrap wood, in "the bush."

No running water, no facilities, not even an outhouse. No power means no refrigeration. No fans. Cooking over an open fire.

The social services representative could not take E.J from his father, in spite of the living conditions, because of "the love that boy and his dad have for each other. Eugene will do anything he can, with his limited means, for that boy. You can see how much he loves his son."

The two new bedrooms, windows, screens, and most importantly, water, are only the beginning. Two real beds will replace the foam they had used as their place to sleep. A volunteer filled that need.

E.J. is excited about his house. His bed. A kitchen, bathroom, and living area are next on the construction plan.

What is your plan? Donate a week. Change a life.

Yours.
