

## A Social Tea Invitation

Tuesday, March 26  
2-3:30 pm – Assembly Hall

### *The Dangers of 5G - What They Are Not Telling You*

We're all being told that the new 5G wireless technology will transform our lives with faster downloads, driverless vehicles, and "The Internet of Things". But we're not being told about the downside - the very serious negative health effects we can expect from this technology. The electromagnetic frequencies it uses can cause headaches, insomnia, tinnitus, memory and concentration problems, skin and eye problems, neurological conditions, and even cancer. And there are similar problems with the "smart meters" that are becoming increasingly widespread. These technologies are being forced on us, without our consent. They not only threaten our health, they also invade our privacy. Learn more about what the dangers are, and what you can do!

**Edie Kantrowitz** - is a board member and past President of NYC Friends of Clearwater, as well as a board member of the climate action group known as United for Action. She has also worked with many other environmental organizations, including the Coalition Against the Rockaway Pipeline, Climate Action Mondays, and the People's Climate Movement.

**Jill McManus** - is a musician and writer, she has worked with CM Ben Kallos to redraft a bill to ban toxic chemicals in NYC parks, and has produced the first diabetes prevention video for the Navajo Nation in English/Navajo.

We hope you will be able to join us! Invite Friends!

**RSVP Requested to Esther Rosado**  
**erosado@ccny.org or 212-683-4988, ext. 123**
