

## Grace Church Financials

Grace Church continues to benefit from broad financial support across all of our ministries. Our tithes and offerings often exceed the budget and provide for additional activities within our financial plan such as building a Capital Reserve account for future requirements and a Capital Campaign for renovation of one of our buildings.

As we continue to grow and add more ministries, we have seen a significant increase in administrative expenses as well as in facility maintenance and utilities. However, we have also enjoyed increased offerings. As a result, the 2019 budget has grown in these categories to ensure we adequately maintain our current level of activity and facility maintenance.

Another example of our financial stability is the 2019 pledge campaign reaching its goal. This is encouraging since in many years pledges often fall short of the goal. Exceeding the pledge goal heralds continued financial support for our ministries. The stability of our financial condition reflects the importance parishioners place on the services provided, the power of Christ in our lives, and the desire to spread the holy Word.
