

Dead? There's an App for That!

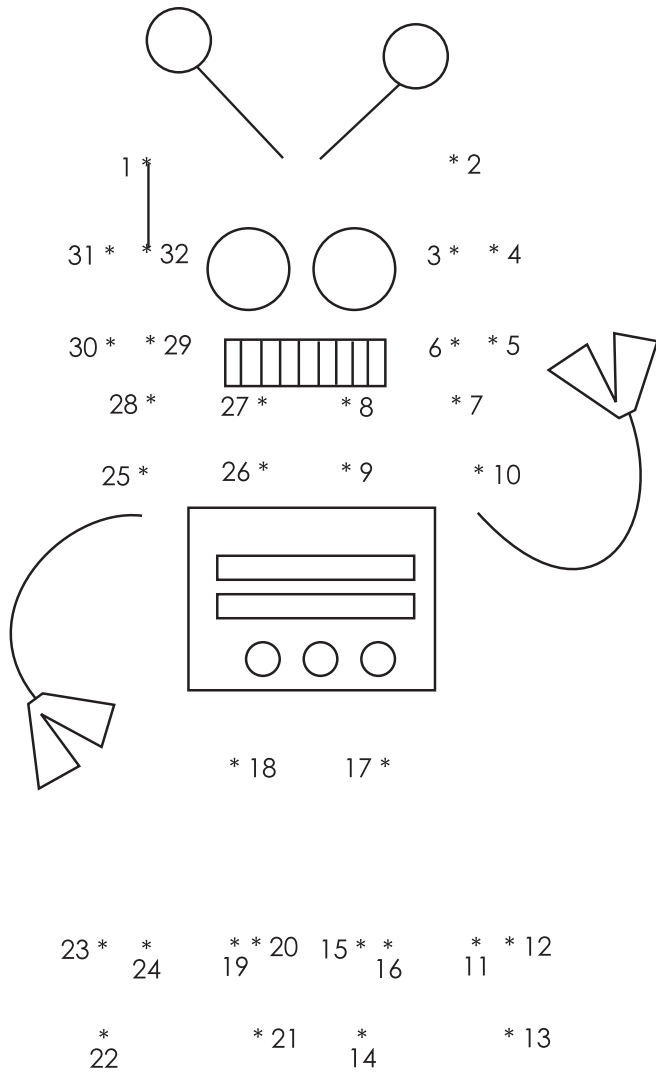

Color the robot and the batteries.

What happens when the batteries are dead in your favorite toy? Does your toy work? Not unless you put new batteries in it, right? What does it mean when a battery is dead? For a battery to work like it was intended to it needs to be charged with electrical power. Jesus comes to a man named Lazarus who was dead, just like the batteries in your toy. But Jesus made Lazarus come back to life, fully charged and ready to go! This is the kind of miracle that God can bring into every minute of our lives!

There's an App for That!

Draw a picture below of your favorite battery-powered toy.

Connect the dots and color.

WORD OF THE DAY

DEAD

no longer functioning
or having life

DEFINITION

PRAYER

Dear God,

Lazarus was dead, just like a battery in a toy that no longer works, yet Jesus brought him back to life, all charged up and ready to go!

Thank you for:

Showing us that miracles, like bringing Lazarus back to life, can happen every day because Jesus loves us all so much.

Help us to:

Remember the story of Jesus and Lazarus the next time the batteries in our favorite toy are dead.

AMEN
