

Presbytery of Eastern Virginia's Congregational Vitality Team's Second Round of Online Worship Technology Grants

Purpose: As we move into a new phase in the COVID-19 pandemic, technology needs among our congregations are changing and becoming more expansive. Online worship and other online ministries have become a major outreach tool that congregations must have to welcome new members. Some churches have multi-stage plans that will require significant investment over time. Over 30 churches have received grants through the first round of grants, so this grant will assist those who are continuing to grow their technology presence.

Grant Award: Up to \$5,000 per congregation.

Eligibility: To qualify for the second round of grants, congregations would need to have received a grant from the first round. Applying congregations are asked to demonstrate how a Second Round Technology Grant will help fulfill their technology vision. Also, explain how these technology needs meet with their vision and purpose as a church. Helpful information would also include how the initial grant has positively impacted their mission and ministry. Congregations would also need to provide detailed estimates of how the funds requested would be used, and what money the church is contributing to the overall project.

Deadline: Unlike the previous grants, these grants will be limited in number and have an August 10 deadline for application.

Procedures

1. Completed applications shall be submitted via email to rrodrigues@pcusa-peva.org by August 10, 2021.
2. Requests will be reviewed and approved by the PEVA Congregational Vitality Team.
3. Applicants will be informed of the decisions by September 10, 2021.
