

# *Building Families*

is excited to announce a new service in your area!

Our new 8-session parenting curriculum was created for parents who want to decrease stress and improve relationships with their kids.

This is a unique series, not offered by any other provider.

We would love to collaborate with you to host this event for your families!

## *small group opportunity*

This small group offers didactic material along with group discussion and experiential learning opportunities.

Each session is fun and engaging!

Emphasis is placed on the development of nurturing parent-child relationships, teaching positive parenting skills, and dignified discipline techniques. Parents will leave each group having learned skills to promote their children's use of appropriate behaviors, both at home and at school!

Please contact me for more info, or to schedule a small group at your school.
