

### **Additional Emergency Projects:**

- Replace the leaking roof
- Replace the deteriorating skylights
- Repairing the deteriorating chimney on the rectory
- Plumbing

Two organizations have come together to help Holy Ghost in our time of need. **Chicago Backflow** will provide their time and labor and **Apollo Valves** will donate the parts for the plumbing backflow protector system that will repair our sprinkler system and plumbing. The permits will be donated by the **City of Wood Dale**. This project's donated cost is about \$6,000. **Thank you to Chicago Backflow and Apollo Valves, and the City of Wood Dale for their concern and care for Holy Ghost Church!**
