

## April Newsletter

### Three Year Old Classes

We will start the month of April talking about Spring and we will identify some things we might hear or see during Spring. We will also be celebrating Easter. Later in the month we will start an exciting unit on **transportation!** We will introduce different ways to get around. We will talk about what flies in the sky, drives on a road, floats on the water and rides on a track!

Some transportation art will include painting with transportation vehicles, and making trains from shape cutouts.

We will challenge our little one's reasoning skills by asking questions like, "Can you take an airplane to school?" and "Can you drive a car to the moon?" We will do a science experiment to determine what floats and what sinks.

Some of the stories we will read are written by Byron Barton, Donald Crews, and Gail Gibbons. . .

*Transportation! How People Get Around, Planes, My Bike, Boats, and Freight Train*

Our spring break is April 15 - 22

Enjoy!

Mrs. Knapp, Ms. Appio,

Mrs. Lepis, Mrs. Genovese, and Mrs. Schott
