

## 3.5 March Newsletter 2022

**As we enter March, we will conclude our unit on balloons with our culminating hot air balloon project and fun balloon science experiments.**

**Our next unit is sure to be a big hit - DINOSAURS! The children will be learning about carnivores, herbivores, and omnivores. They will be paleontologists and discover dinosaur fossils and will have fun imagining the fun things we would do with dinosaurs if they came back. Our study of dinosaurs will include some fun art projects and special songs.**

**Conferences will be held this month. We cannot wait to meet with you and share all the wonderful learning taking place this year at school!**

**We end the month with long-awaited spring!**

**Mrs. Walsh, Mrs. Buccino, Mrs. Egan & Mrs. Donofrio**
