

Health Ministry Report for 2018:

Opioid Taskforce met last spring to discuss the ways at the Episcopal Church could possibly help people who are having difficulty with addiction. We received much information to use in our individual churches. The taskforce had a follow-up meeting this September. These meetings are also available via webcam meetings.

Health Ministry had a table displaying healthy options and also information regarding the opioid epidemic. I was also able to give out healthy snacks.

During the Maryland Convention the Health table appeared very well received. I gave many handouts regarding the opioid epidemic, plus information regarding many other health issues. The healthy snacks were a big hit. I also was able to take blood pressures of anyone interested.

I was unable to attend any other conventions in the Province do to my work schedule this fall.

Respectfully Submitted
