In each time slot, number 1-3 your top choices (1 being your first choice). We will do our best to fulfill your #1 choice wherever possible. Due to class limitations, registrations will be considered as they are received. Please note that registrations are not complete unless accompanied by camp fee. Session One is \$60 and if you register for both sessions the fee is \$75. If you have any questions, please do not hesitate to call Linda Cain or Susan Harrell at 539-0540.

Registration deadline is June 29.

ART

Conceptual Self-Portrait - grades: 6-8 10 student limit

This class will learn the basics of facial proportions and using that skill they will create a line drawing of their face, and abstract it and use color and texture to enhance the image. (55-minute class)

Abstract Expression in Collage - grades: 6-8 8 student limit

Students will select a verse or passage from scripture, define the principle concept, and discover how color, texture, and shapes can be used to express that concept in a multi-media collage. (55-minute class)

Block Printing - grades: 3-8 10 student limit

Students will design, cut and print a vinyl block. Then they will alter and reprint the same block to create a multi-color print. (55-minute class)

Drawing and Painting - grades: 3-8 10 student limit

This class will explore the beauty seen in the designs, colors, and patterns found in the insect and reptile worlds. They will draw and paint an enlarged version of the “critter” and mount it for display. (90-minute class)

Oil Pastel - grades: 6-8 8-10 student limit

Oil Painting without the mess and waiting for your painting to dry. Discover the joy of painting in oil pastels and the “richness” they give to your images. Experiment with techniques and effects and finish with a final project of a realistic self-portrait. (90-minute class)

SCIENCE CLASSES

Scratchboard - grades: 3-8 10 student limit

Fur, Feathers and Fun. Exploring scratchboard techniques using images of animals, birds, weathered wood and other “linear” based images. Discover the fun of finding the light within the shadows. (90-minute class)

How to See What You Draw - grades: 3-5 and 6-8 10 student limit

This is a beginning drawing class, but the principles and exercises we will be doing will benefit all skill levels. It is said all great illustration is 90% observation and 10% putting pen or pencil on the paper. We will be drawing a lot but learning how to observe more. (90-minute class)

Paper Mache` - grades: 3-4 and 5-6 and 7-8 10 student limit

Paper Mache` is one of the most versatile crafts around. There is no right or wrong way to do it. In this class, students will learn a brief history of the art of paper Mache`. Students will also learn about traditional paper Mache` techniques and mediums to be used for the construction of their own sculpture. This activity is messy. Students will need to wear old clothes. The nature of the class will be the same for all the grades, but the level of the project will vary based on the ages. (90-minute class)

EGG-STRAVAGANZA! grades: 3-8 10-12 student limit

This class will use real eggs as a "canvas" for painting. We will look at samples, learn the process used to prepare the egg, design, paint and display these unique and EGGseptional works of art. (55- minute class)

The Mysterious Seas - grades: 3-5 and 6-8 15 student limit

Our class will investigate the underwater kingdom designed by our imaginative Creator through fun experiments, creating an ocean box, and several sea creature dissections. We will offer classes for 4th-5th grade and 6th-8th grade students. Students will walk away with a take-home ocean-box summarizing what they have learned during the week. (90-minute class)

BOTTLE ROCKETS - grades: 3-5 and 5-8 10 student limit

Learn about basic principles of aerodynamics as you design, build, and launch your own water-powered soda bottle rocket. Safety glasses will be required at the launch site, and will be supplied if you do not have them. (90-minute class)

Wooden Bridge Building - grades: 3-8 10 student limit

Design, build, and test your own model wooden bridge. We will learn the history of bridges back to Biblical times and some Scripture relating to symmetry and order. (90 minute class)
