*Newsletters* Targeted Mailings

## Facilitate Effective Fundraising and Communication

*Keeping accurate and up-to-date contact information is a challenge facing any diocesan office. Parishes constantly evolve as members come and go. Attempts at effective communication using old or incomplete databases result in needless time spent and money wasted.*

*With over 8,000 Catholic clients, we realize the value of effective communication in the ministry environment and importance of consistent and accurate contact databases across parishes and dioceses. Our software systems give you the tools to know and interact with your parishes and schools even as they grow and change.*

**The PDS Development and Communications Solution™ enables you to synchronize family information with parishes and schools, so you can focus your efforts on fundraising, stewardship, and communication.**

### DioOffice

PDS DioOffice™ enables diocesan offices to gather names and addresses from parishes and schools and manage them in one database. As this information is routinely exchanged, it can be synchronized and used for mailings, tracking contributions, fund drives, annual appeals, and statistical analysis. DioOffice has the capability to manage a wide range of contacts and pledge entries, monitor statuses and support mail campaigns. DioOffice also provides a wide variety of reports, lists, letters, statements, and the ability to export.

### DioOffice Server

DioOffice Server is the staging mechanism for parishes to submit data, for dioceses to collect data, and vice versa. DioOffice Server is provided as a hosted offering from PDS. Churches and the diocese are provided a secure address for the exchange of files.

### Church Office

PDS Church Office™ makes it easy for parishes to gather and manage the details of their members, sacraments, pledges, and more. Stewardship Reports, an add-on feature, helps churches to plan, implement, and analyze the time, talent, and results of their stewardship campaigns.

### School Office

PDS School Office™ is an easy way to manage family, student, teacher, and class details of private or parochial elementary schools within the diocese. School Office Online allows parents to log-in anytime and access student information.

### Development Connection

Development Connection is an application that provides an interface to Blackbaud's® Raiser's Edge.™

### Forms and Supplies

PDS Forms and Supplies such as statements and bar code readers are conveniently available and guaranteed compatible with PDS software.

**We have a solution for you.**

Inside Your Church and School Offices

Inside Your Diocesan Office

*The PDS Development and Communications Solution gives you the tools to know and interact with your parishes as they grow and change.*

## Hosting Services

Hosting Services are available to provide internet access to applications at the parish, school, or diocese.

## Implementation Services

Implementation services are offered by PDS trained and certified implementation specialists and include project management, training, and consulting to ensure parish and diocese goals are effectively accomplished.

## Data Conversion Services

Data Conversion Services include data conversion to PDS databases at the parish and diocese.

## Backup Recovery Services

LiveStor™ protects all valuable data by performing scheduled file backups according to customized criteria. Data is securely transferred over the Internet to a PDS remote location so parishes and dioceses can have peace of mind.

## Web Site Management

The Extend Platform™ enables users to build and maintain a professional looking Web site quickly and affordably. Plus, add features like video or audio streaming, online donations and event registration.
