

Consulting and Training Services

PDS Consulting and Training services will help you find the best mix of business process and PDS applications to fit your needs. Consultants will visit onsite to guide you on how to use advanced software functions and work with you to plan the use of your PDS applications and services. Trainers focus specifically on the use of PDS software for church, school and the diocese. Training can be done online or in person as a structured class. Specific classes are available for parish and diocesan applications such as:

- Church Office™
- Formation Office™
- School Office™
- Ledger™
- Ledger/Payroll™
- Facility Scheduler™
- DioOffice™ and DioOffice Server™
- DioView™ and DioView Server™

Project Management

PDS Project Management services help you to make sure your project meets the business objectives and is completed according to your schedule. Project managers serve as the primary contact point for the status of projects and the deployment of specific service resources for the project. Primary functions include:

- Project plan development
- Project scope management
- Schedule management
- Communications management
- Resource coordination

Implementation Services

PDS Implementation services help you to get your diocesan solution set up properly, including Web services setup, test environment setup and transition to production.

- Parish and Diocesan site readiness
- Network assessment
- Configuration

Web Site Management

Web Site Management service consultants can help you assess your current Web site, migrate to Extend and/or design a new Web site.

The Extend Platform makes it possible to manage your organization's Web site whenever you wish. With simple online tools, you and your staff can login and edit your Web site in Extend as you navigate through it in a browser. And depending upon your needs, there are several options to help provide the content, functionality, and applications you need.

- Web site design
- Web site integration
 - Online donations
 - Media streamlining
 - Online event registration
- Web site optimization
- Web site hosting

Hosting Services

Hosting services provides you the freedom to access your church or diocesan application from the Internet and the comfort of knowing that your applications are maintained with the latest versions in a secure server environment. PDS diocesan solutions are designed to employ middleware hosting services.

Rather than residing on your desktop, the software and its contents reside at ACS Technologies®. Log into the software from the Internet and enjoy full functionality.

- Parish application hosting
- Diocese application hosting
- Middleware hosting*

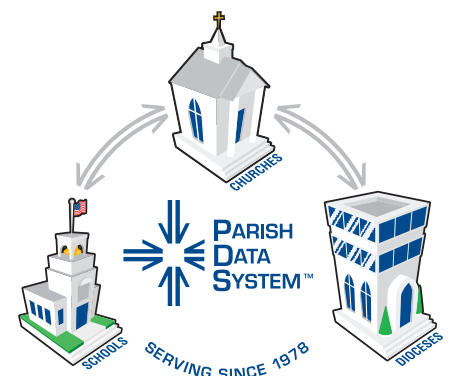

*Web services for parish upload to the diocese and for the diocese to return information to the parish.

Data Services

PDS Data Services offers data conversions for parish databases and for diocesan databases as well as CASS certifications. Our variety of data-related services are dedicated to optimizing your time and money.

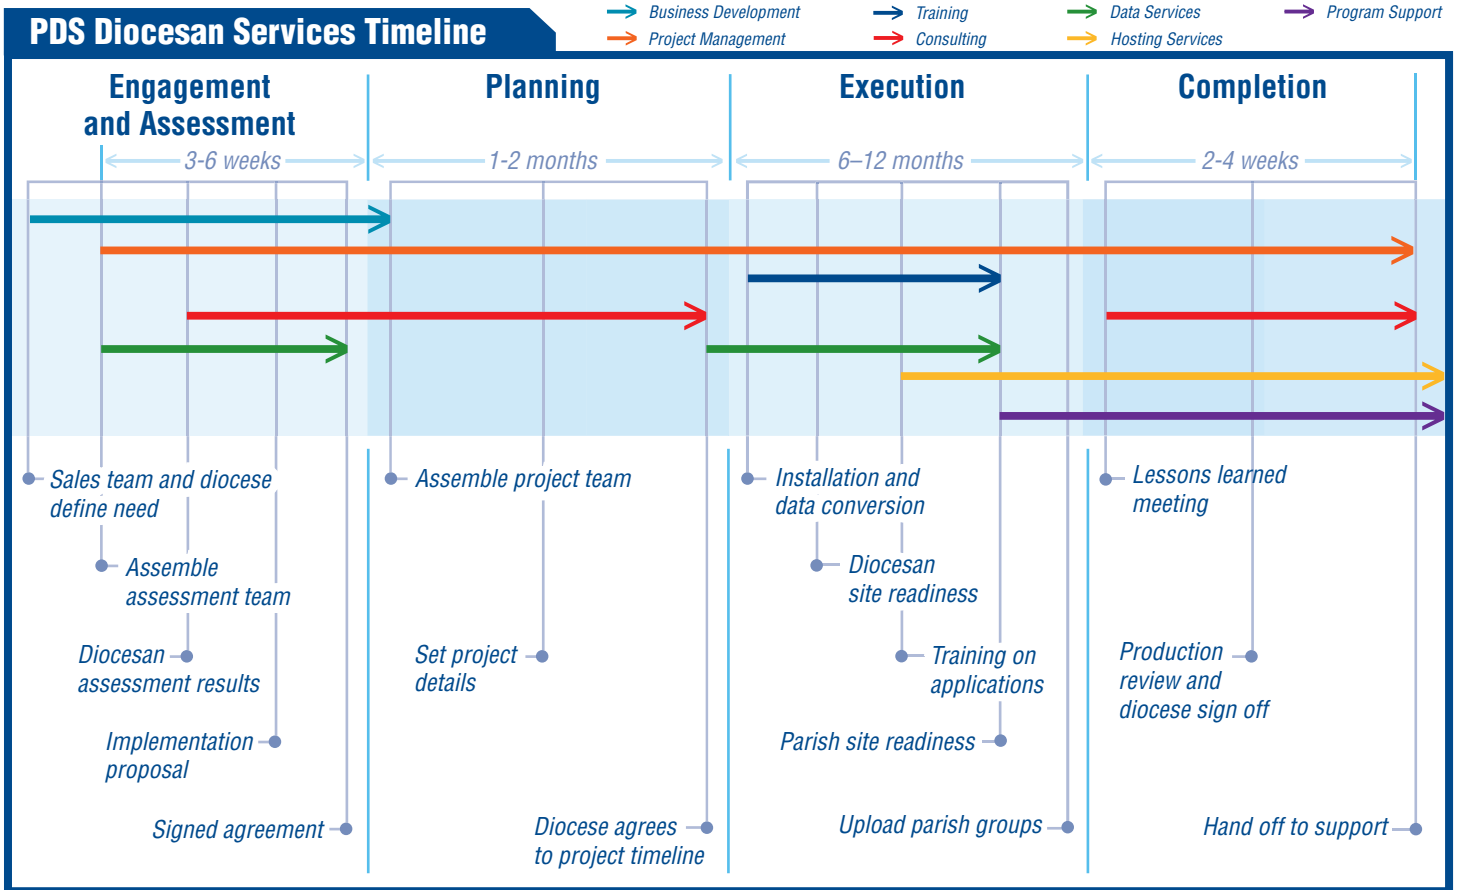

File Backup & Recovery Services

LiveStor™ protects your valuable data by performing scheduled back-ups according to customized criteria. LiveStor can be used to protect your PDS back-ups and any other files you select. All data is securely transferred over the Internet to our remote location so you can have peace of mind.

We have a solution for you.

This diagram illustrates typical steps to implement a PDS Solution for a diocese and associated parishes.

About PDS

Since 1978, Parish Data System has been the leading developer of Catholic management software solutions by meeting the needs of over 8,000 parishes, schools and dioceses worldwide. In 2004, PDS joined forces with another church management software leader, ACS Technologies, combining strengths and staff to offer the industry's best support and training along with the broadest line of church management software solutions. PDS software is used by many of the parishes in dioceses throughout the United States making it the top choice for Catholic management software and services. PDS continues to develop new technology solutions that aim to enable accurate data management, increase communications, and empower growth within Catholic organizations.
