

Product and Service Overview

ACS PeopleSuite™

The cornerstone of all ACS products, People Suite reliably tracks, organizes, and analyzes complex information about the people with whom you interact or serve. From first time visitor to faithful donor, this suite empowers you to foster participation and coordinate various activities and programs. These products are used on a daily basis and provide a central location for all your information and communication. People Suite consists of the following integrated modules:

- People
- Attendance
- Contributions
- Connections
- Reservations
- Special Mailings
- Checkpoint
- Yahrzeit

Organizations™

Organizations helps denominational offices and large, multi-tiered churches track statistical data and information about the associated organizations they support or influence. The Organizations application pulls church staff and lay leader data together, so you can generate comprehensive church office directories, produce comparative reports and graphs, follow trends, and get mailings to the right people at the right organization.

Access ACS™

Access ACS connects you to your People data whenever you are outside of the office – either on the road or at home. Simply go online to access member information, send group e-mail, or update records. Plus, members may sign in to submit changes to their own information, view contributions, or get more involved in small groups and events.

ACS FinancialSuite™

The Financial Suite is a collection of fund accounting products that are specifically designed to handle the unique financial needs of faith-based nonprofit organizations. Within a simple interface, users can manage multiple accounts, designate funds, handle tuition or fee-based services, and satisfy IRS and FASB requirements. It consists of six modules that have set the standard for faith-based financial management software:

- General Ledger
- Accounts Payable
- Payroll
- Purchase Orders
- Accounts Receivable
- Fixed Assets

HeadMaster Software

HeadMaster Software simplifies the administrative tasks of private, parochial, and independent schools or daycare facilities. It manages student, parent, and teacher information in one place and provides tools for flexible grading, reporting, class schedules, attendance, or other customizable fields.

There are 4 levels of HeadMaster:

- HeadMaster
- HeadMaster Plus
- HeadMaster Pro
- HeadMaster Pro CM

And 2 optional companion products:

- HeadMaster Billing
- HeadMaster Online

EXTENDplatform®

The Extend Platform makes it possible to manage your organization's Web site whenever you wish. With simple online tools, you and your staff can login and edit your Web site in Extend while navigating through it in a browser. And depending upon your goals, there are several options to help provide the content, functionality, and applications you need.

Extend is available as:

- A single Extend Web site
- A community of Extend Web sites

Other integrated applications:

- Access ACS
- Media Streaming
- Online Donations
- Online Event Registration

Report Designer™

The ultimate reporting tool designed to create flexible reports, support advanced reporting needs, and produce specific information with a particular look.

Church Growth Tools™

Makes it easy to assess the involvement and attendance patterns of people and helps develop targeted communication and programs to engage them.

Mail Modules

CASS It!™, Max It!™, and Max It! for Periodicals™ are modules that will help organizations sort through postal regulations and prepare the right documentation to save time and money on bulk mailings.

Ministry Scheduler™

A centrally-accessed calendar and facility management tool that allows users to set up and synchronize calendars for all aspects of the organization – from birthdays to reserving a room.

Volunteer Manager™

Helps organizations track and develop volunteers by quickly identifying an individual's gifts, skills, and passions and then matching them with appropriate ministry opportunities.

LiveStor™

Protects your valuable data by performing file back-ups according to pre-defined schedules. All data is securely transferred over the Internet and protected in our remote location.
