

I PhoneTree 2100

The PhoneTree 2100 is an easy-to-use, affordable single-message calling solution, offering many advanced features with the flexibility of multiple phone lines. Operation is so simple, you can start calling within minutes of taking the unit out of the box. You just record another message for the next job, import your list and start calling.

- Multiple area codes? Long-distance or local? Metro dialing? PhoneTree's dialing translator easily handles any type of number.
- If the line is busy or no one is home, PhoneTree "remembers" to try again later, attempting busy lines sooner than those not answered, just as you would.
- By using multiple phones lines, you can reach large numbers of people in a fraction of the time otherwise required for a person to make the same number of calls.
- Make sure your calls aren't lost in the "kid zone" by having call recipients press "9" to play your message after hearing your greeting.
- Comes as a one line unit, with the option to purchase an additional line.

J PhoneTree 2500

With a host of features for a wide variety of applications, PhoneTree 2500 is the best choice for busy, growing organizations who need both power and flexibility. PhoneTree 2500 has the unique ability to allow multiple call sessions at one time – even if using only one phone line. There is no need to wait to finish a call job before starting a new one – the 2500 can handle all your calls at once.

- Reach large numbers of people quickly with multiple simultaneous call sessions using up to 32 phone lines at once.
- Choose which job is called first, in case of emergencies or other time-critical situations.
- Receive feedback via touch-tone reply: "Press '1' if you can attend Saturday's picnic ... Using your touch-tone keypad, enter the number of guests you plan to bring ..."
- Start calls from any computer on your network – no need to work from only one PC.
- Send companion e-mail and text messages along with your calls at the same time, giving your messages the best chance of getting through.
- Full-featured multilingual capability allows you to send messages in different languages within one call session.
- Comes as a one line unit, with the option to purchase additional lines.

K PhoneTree 3500

The PhoneTree 3500 is a full-featured, fully-customizable, and complete telephone messaging solution. Unique to the 3500 is PhoneTree's Flex Fields feature, which lets you construct messages section-by-section, based on your existing data. Along with all the features of the 2500, plus unlimited list capacity, unlimited calls per session, text to speech, full remote access and custom call-in information lines, the PhoneTree 3500 is an automated messaging powerhouse.

- Flex Fields let you deliver flexible messages like, "Hello. This is Dr. Jones calling for [NAME] to remind you of {EVENT} on [DATE] at [TIME]."
- Reach large numbers of people quickly with multiple simultaneous call sessions using up to 48 phone lines at once.
- If a call is at first unanswered, you can attempt alternate phone numbers (cell, pager, etc.).
- Make a professional, memorable impression on those being called with highly-personalized messages, requiring only minimal setup.
- Comes as a two line unit, with the option to purchase 46 additional lines.
