

Landmines in the Path of the Believer

—DR. CHARLES STANLEY

Hidden and potentially harmful, landmines are one of the most devastating weapons of warfare. And just as there are physical landmines placed along roadsides and open fields, there are strategically placed landmines in the path of every Christian, says Dr. Charles Stanley in his book, *Landmines in the Path of the Believer*. When we step on one of the Enemy's landmines, the explosion that follows usually has an adverse effect on our relationship with God and others, so we need a battle plan.
