Subject: Re: SACS Question about Computer Lab and Classroom Updates

Greg Pryor received a Hewlet Packard grant which got us 20 laptops which we have been using in the Biol. 105 lab on a regular basis and other labs as needed. They are sort of a traveling computer lab.

Subject: SACS Question about Computer Lab and Classroom Updates

Department Chairs and Deans,

Can you help me fill in some details in one of our compliance report drafts? In CR 2.11, we're describing some of the technology initiatives we've undertaken that help support our programs, services, and mission.

Here is the question:

In the past two years, which computer labs and computer classrooms in your areas have been updated with newer equipment?

If you can help me list specific rooms in our teaching facilities, just reply to this email.

Thanks.

Lynn
